

Toronto Property Crime Analysis: Changes in Rates and Types of Property Crimes (2014-2023)*

Jimin Lee

September 27, 2024

This paper aims to explore Toronto’s property crime rates and types of property crimes from 2014 to 2023. The analysis reveals a spike in property crimes in 2023, with shifts towards crime types such as break-and-enter and auto thefts.

1 Introduction

In 2023, Toronto’s property crime rate rose by 22.28% from 2022, reaching a total of 189,977 recorded incidents, breaking the highest recorded value of property crimes in the city. @Statista2023 This paper explores and compares the rates of property crime across different geographic divisions of the City of Toronto.

2 Data

The dataset used for this paper is “Police Annual Statistical Report” (Services (2024)), accessed through the Open Data Toronto portal (Gelfand (2022)). The dataset was simulated, downloaded, cleaned, and analyzed using the R programming language (R Core Team (2023)). Despite the existence of other datasets in OpenDataToronto such as “Police Annual Statistical Report - Victims of Crimes”, it wasn’t chosen for this analysis as the paper focuses solely on property crimes.

*Code and data are available at: <https://github.com/jamiejiminlee/Toronto-Reported-Crimes.git>

Figure 1: Figure1: Graph compares the number of property crimes from 2013 to 2024, in 1-year increments. Figure displays a sudden spike in property crimes in 2023 - we will be analyzing the data from 2023 to compare different types of property crimes that occurred

3 Model

The goal of our modelling strategy is twofold. Firstly,...

Here we briefly describe the Bayesian analysis model used to investigate... Background details and diagnostics are included in [Appendix](#).

3.1 Model set-up

3.1.1 Model justification

We expect a positive relationship between the size of the wings and time spent aloft. In particular...

We can use maths by including latex between dollar signs, for instance θ .

4 Results

Our results are summarized in .

5 Discussion

5.1 First discussion point

If my paper were 10 pages, then should be at least 2.5 pages. The discussion is a chance to show off what you know and what you learnt from all this.

5.2 Second discussion point

5.3 Third discussion point

5.4 Weaknesses and next steps

Weaknesses and next steps should also be included.

Appendix

A Additional data details

B Model details

B.1 Posterior predictive check

Examining how the model fits, and is affected by, the data

B.2 Diagnostics

Checking the convergence of the MCMC algorithm
